

Double Screw Continuous Mixing System

High efficiency

The yield is 3-5 times that of the PD mixer

High quality slurry

Stable and uniform finished slurry;
Size $\leq 15\mu\text{m}$ ($D_{90}=17.5\mu\text{m}$)

Lower energy consumption

Unit energy consumption reduced by more than 60%

Self-cleaning

Ensure that the slurry-mixing process is stable,
the slurry is not caked, no blocking, easy to clean

Good effect in cooling slurry

Accurate material measurement and temperature
control of main engine
